1. Warehouse Selection

A screenshot of a login dialog box for the GOAL program. It features four input fields: 'UserName' with the text 'CAGDASCAN.GUL', an empty 'Password' field, a 'Language' dropdown menu showing 'English' with a UK flag icon, and a 'Login to the Computer User' checkbox which is checked. At the bottom are two buttons: 'OK' with a green checkmark icon and 'Cancel' with a red X icon.

UserName	CAGDASCAN.GUL
Password	
Language	English
Login to the Computer User	☒
OK Cancel	

This guide has been prepared to explain the GOAL processes to be used by franchise partners. After logging into the GOAL program, the username and password are entered by the franchise partners. English or Turkish versions can be selected.

RETAIL WHOLESALE DASHBOARD

- * The first step is to fill in the "Customs Start Date - Time" field.
- * The second step is to fill in the "Customs End Date - Time" field.
- * "Customs Start Date - Time" should be entered after the shipment boxes arrive at customs for customs clearance. This is the start date and time of the customs clearance process.
- * "Customs End Date - Time" should be entered when the customs clearance process is completed. Both fields must be filled to determine the time spent in customs.

RETAIL WHOLESALE DASHBOARD

Click on the "Warehouse Shipment" tab. In the window that opens, enter a random number in the "Expedition Serial" and "Expedition No" fields.

In the description field, a short sentence or keyword explaining the reason for the shipment should be written. Finally, select the receiving warehouse.

For central warehouses, the receiving warehouse must be selected from warehouses with "size quantity" status. The warehouses with size quantity status available for this process are as follows: DC, DU, ID, IMHD, INS, and YD.

To prevent the application from timing out during transfers between central warehouses, it is recommended not to exceed a maximum of 20,000 units per shipment.

If products from the country operation are stacked as size quantity, shipments can also be made directly to stores. For store shipments, it is recommended not to exceed 1000 units. Shipments exceeding 1000 units do not appear directly on the Retail Store screens; in such cases, a ticket should be opened in the 1818 system to request support.

RETAIL WHOLESALE DASHBOARD

In the window that opens, the XLS file to be used for the upload format is selected. (For FR operations, only the first format is used.)

The Excel upload format is automatically displayed on the computer screen.

The screenshot shows the Microsoft Excel application window. The title bar indicates the file is named 'Kitap1 - Excel'. The ribbon is set to 'Formüller' (Formulas). The formula bar shows 'H15'. The active sheet is 'Boxes'. The table contains 14 rows of data with 4 columns: Box Barcode, Item Barcode, and Quantity. The data is as follows:

	A	B	C	D	E	F	G	H	I	J	K	L
1	Box Barcode	Item Barcode	Quantity									
2	150159092000006848	8684144599655	1									
3	150159092000006848	8684144599686	3									
4	150159092000006848	8684144599716	1									
5	150159092000006848	8684144599747	1									
6	150159092000006848	8684144599778	3									
7	150159092000006848	8684144599808	2									
8	150159092000006848	8684144599839	2									
9	150159092000006848	8684144599860	7									
10	150159092000006848	8684144612637	1

14	150159092000006848	8684144612675	6									
15												
16												

The TTN numbers to be created are determined with barcode and quantity details. (For FR Operations, the tematracking numbers, barcode, and quantity information sent by the store to the open quantity warehouses are entered. It should be noted that since the operation performed on the Goal screen is virtual, partners do not actually change the tematracking numbers, and therefore parcels must be created with the same numbers.)

New Box Status

If the quantity of parcels to be shipped from the CD warehouse is large, the XLS format provided below is downloaded to the computer. (For FR operations, the second upload format is used.)

The XLS file automatically opens on the computer. A format is created with the tematracking number for which the destination will be changed and the desired store code for shipment, then saved to the computer. It is important to ensure that when selecting parcel numbers, the system's most recently generated new tematracking numbers are entered.

RETAIL WHOLESALE DASHBOARD

All past statement information for the parcel appears on the screen.
It is generally used to identify the systemic locations and shipment history of some parcels.
